THE BANKLIFE PROJECT

Adam Thompson CEO and Co-Founder

I was born and educated in the UK and have worked in several prestigious businesses in various countries prior to starting the Banklife project.

During this time I have worked in numerous areas of finance such as retail banking, corporate, mortgages, investment, foreign exchange, regional management and compliance, thus gaining over 20 years experience in the financial sector.

BANKLIFE OVERVIEW

Banklife is a platform that helps our investors optimise their profits from idle funds in the most effective manner. We've built a system to support more and more services and the perfect crypto solutions for our investors to get the highest interest rate. In addition, our high technological AI (Artificial Intelligence) helps recommend smart investment plans providing optimal profits for investors. With this system we are confident that we can make long-term profits for potential investors who use our system.

OUR MISSION

We keep innovating ways to harness the power of blockchain technology to facilitate financial inclusion. At Banklife, we want to make digital currencies more accessible to more people across the globe and further increase the value of digital currencies for all.

The goal of Banklife by 2025 will serve 1.5 billion people on the Banklife global platform.

OUR PARTNERS

Banklife co-operates with large platforms using Smart contract “Ethereum” to log in through reputable platforms such as “Metamask” and “Trust Wallet”. Thus, you can use it safely without worrying about your wallet.

SAFETY WITH BANKLIFE

- We have placed an ITO insurance fund worth over \$10 million to ensure the development of Banklife and ensure safety benefits for users when connecting to the Banklife platform.

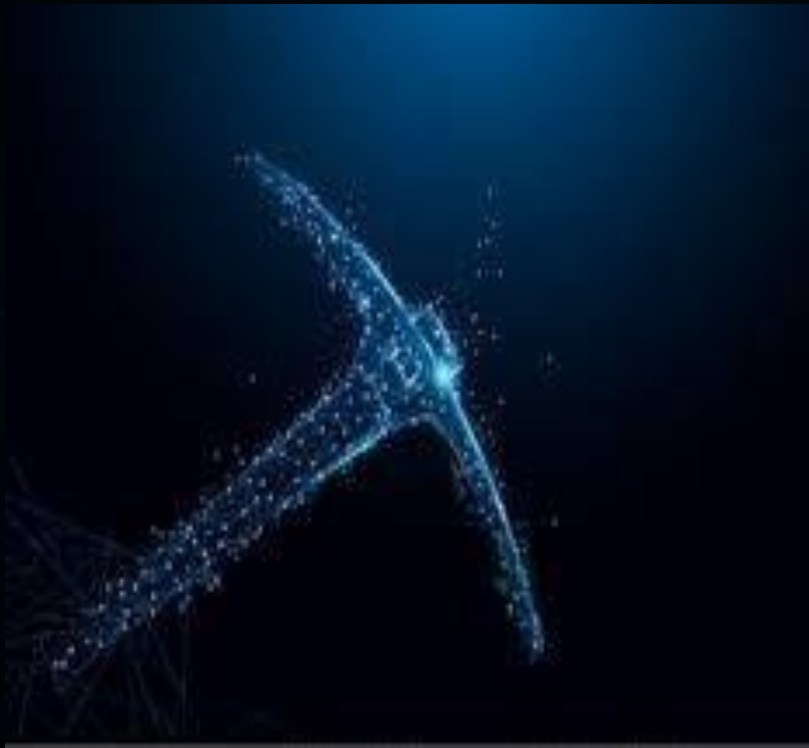

- **Insurance Fund Banklife for investors.**

Each time receiving ETH or Banklife Token, Smart Contract of the reserve fund will immediately lock down 85% and extract 15% into the developer fund to implement items.

The Reserve Fund is used to ensure the total amount of tokens circulating in the market always has the minimum actual reciprocal value

MINING

To mine Banklife Token users need to buy a “Treasury Package” with a minimum amount of ETH of \$100, the maximum “Treasury Package” is up to \$1,000,000. The developer will have a function in Dapp to set the maximum value of the package that can be purchased at different times.

MINING

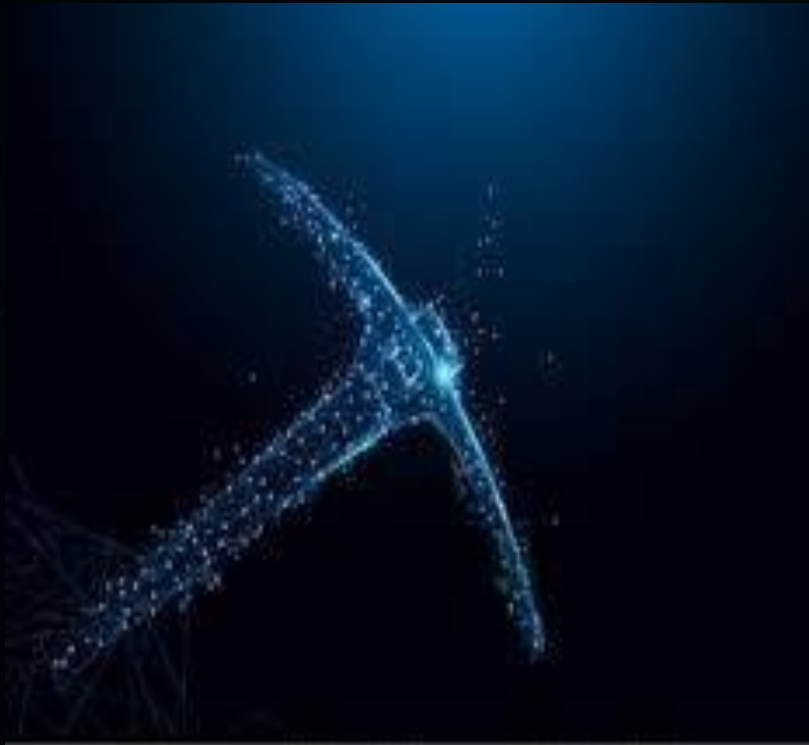

Treasurey includes 3 wallets

- Gold Wallet
- Green Wallet
- Mining Wallet

We use only Green Wallet to get commision every day (to mine), Gold Wallet is only active when you have your own system.

MINING

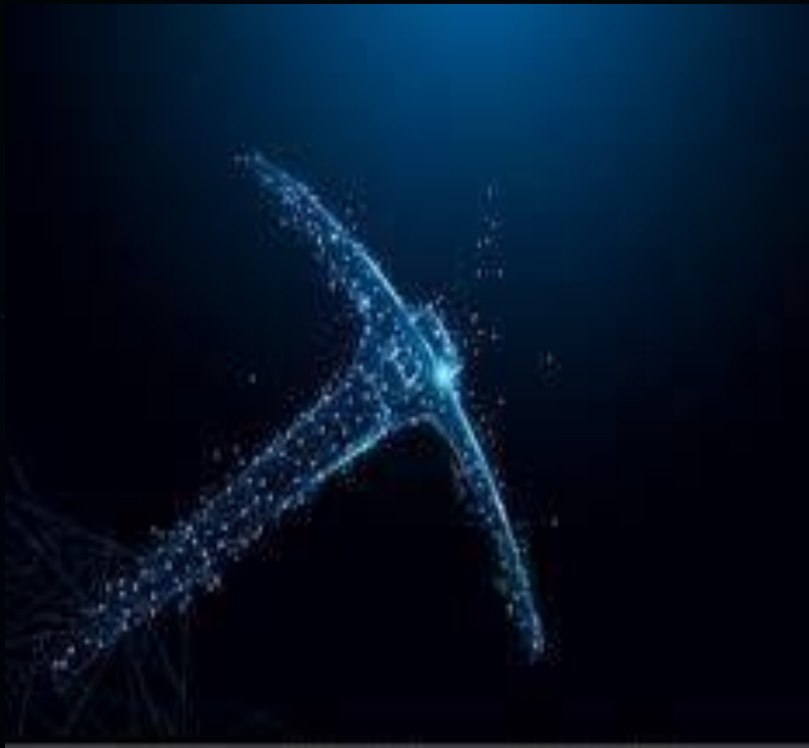

- When you activate a “Treasury Package” the “Gold Wallet” will add 1000% of the value of the package you have purchased.
- The “Green Wallet” will add 200% of the package value on the first purchase and 100% of any additional packages purchased thereafter.
- For example: If you buy a “Treasury Package” for the first time with the value of \$1,000 you will have \$10,000 in your “Gold Wallet” and \$2,000 in your “Green Wallet” for the first purchase.

MINING

- From Green Wallet, you get commission with the rate fluctuated from 0.3% to 0.9% depending on market but never falling under 0.3%.
- You can get your daily commission from your Mining Wallet.
- When the Mining Wallet receives a total value of 100% of the package you've brought, the rate will decrease 0,1%.
- When the "Mining Wallet" receives a total value of 400% of the package you've brought, the rate will decrease more 0.1%.

MINING

- When you own Banklife Token you can store for a long time, trading on a free trading platform or swap into a Smart Contract containing a reserve fund to collect ETH.
- You can also use Banklife Token for other transactions such as trading or re-investment, depending on your purpose.

COMMISSION

At Banklife we want everyone to share in the success of Banklife and give back to the whole community. So how can you win?

You can exploit more Banklife Tokens when you take advantage of your “Gold Wallet” which received 1000% of your own initial “Treasury Package” purchased by developing your mining:

When directly introducing a new member to the Banklife Token mining community, which we call F1, you will receive 50% of the “Treasury Package” that F1 purchases. This value will be moved from your “Gold Wallet” to your own “Green Wallet”.

For example: if you introduce a \$10,000 “Treasury Package” buyer, you will get 50% (\$5,000) to move from your “Gold Wallet” to your “Green Wallet” and you can continue to introduce new members until the amount in your “Gold Wallet” reaches zero.

COMMISSION

	CONDITION	%
F2- F5	- 2F1 receives 10% of F2 - 3F1 receives 10% of F3 - 4F1 receives 10% of F4 - 5F1 receives 10% of F5	10 %
